Home health care software or home care software falls under the broad category of Health care Information Technology (HIT). HIT is "the application of information processing involving both computer hardware and software that deals with the storage, retrieval, sharing, and use of health care information, data, and knowledge for communication and decision making"

## **Home care - Wikipedia**

Surgery is a medical specialty that uses operative manual and instrumental techniques on a patient to investigate or treat a pathological condition such as a disease or injury, to help improve bodily function or appearance or to repair unwanted ruptured areas.. The act of performing surgery may be called a "surgical procedure", "operation", or simply "surgery".
